### Description

## Capgemini Recruitment 2024

Are you an Oracle SQL whiz with a passion for building high-performance databases? Do you thrive in a collaborative environment and enjoy tackling complex technical challenges? If so, then Capgemini wants to hear from you!

We're seeking a talented Oracle SQL Developer to join our growing team and play a key role in designing, developing, and maintaining critical database systems. In this role, you'll leverage your expertise in Oracle SQL to create efficient and scalable solutions that support our business operations and drive strategic objectives.

### Why Join Capgemini?

Capgemini is a global leader in consulting, technology, and digital transformation services. We offer a dynamic and stimulating work environment where you'll have the opportunity to collaborate with brilliant minds on cutting-edge projects. Here are just a few reasons why you'll love working at Capgemini:

- **Work on impactful projects:** You'll have the chance to contribute to real-world projects that make a difference for our clients and the communities we serve.
- **Continuous learning and development:** We invest heavily in our employees' growth and provide comprehensive training programs to help you stay ahead of the curve.

- **Global reach and opportunities:** As a global company, Capgemini offers a wealth of opportunities to work with colleagues from around the world and potentially travel internationally.
- **Collaborative and supportive culture:** We foster a culture of teamwork, innovation, and mutual respect, where everyone is encouraged to share their ideas and contribute to our success.
- **Competitive benefits package:** We offer a comprehensive benefits package that includes health insurance, paid time off, retirement savings plans, and more.

## Capgemini Jobs Near Me

This role is open to qualified candidates regardless of location. As a remote-friendly company, Capgemini empowers its employees to work from anywhere in the world, fostering a diverse and inclusive work environment.

## Job Summary

As an Oracle SQL Developer at Capgemini, you'll be responsible for the full lifecycle of database development, from designing and implementing efficient database structures to writing complex queries and stored procedures. You'll work closely with business analysts, developers, and other stakeholders to understand data requirements and translate them into robust and scalable database solutions.

## Key Responsibilities:

- Design and develop high-performance database schemas using Oracle SQL best practices.
- Write, test, and optimize complex SQL queries to retrieve and manipulate data efficiently.
- Develop and maintain stored procedures, triggers, and functions to automate database tasks.
- Perform data migration and transformation activities to ensure data integrity.
- Implement and enforce data security measures to protect sensitive information.
- Monitor database performance and identify opportunities for optimization.
- Troubleshoot and resolve database issues to ensure system uptime and availability.
- Document database design, queries, and procedures for future reference.
- Collaborate with business analysts and developers to understand data requirements and translate them into technical solutions.
- Stay up-to-date with the latest advancements in Oracle SQL technologies and best practices.

## Required Skills and Qualifications:

- Proven experience as an Oracle SQL Developer or a related database development role.
- Strong understanding of relational database concepts, data modeling, and normalization techniques.
- Proficiency in writing complex SQL queries, including joins, subqueries, and aggregation functions.
- Experience with stored procedures, triggers, and functions.
- Familiarity with data security concepts and best practices.
- Excellent analytical and problem-solving skills.

- Strong communication and collaboration skills.
- Ability to work independently and as part of a team.

#### **Experience:**

This role is open to both experienced Oracle SQL Developers and talented individuals with a strong foundation in SQL and a passion for database development. We encourage recent graduates and those looking to transition into a database development career to apply.
