### Description

#### Google Recruitment 2024

As an Embedded Software Engineer at Google, you'll play a crucial role in bringing our next-generation hardware products to life. You'll be responsible for the entire software development lifecycle, from designing and implementing low-level firmware to integrating with higher-level software components. You'll work closely with cross-functional teams, including hardware engineers, system architects, and product managers, to ensure seamless integration and optimal performance.
