### Description

## IBM Recruitment 2023

The Java Developer is responsible for developing, testing, and maintaining Java-based applications for IBM. This includes tasks such as designing and coding applications, unit testing, and debugging. The ideal candidate will be a highly skilled Java developer with experience in object-oriented programming and software development principles.

### Responsibilities:

- Design and develop Java-based applications.
- Unit test and debug Java code.
- Work with other developers to integrate Java applications with other systems.
- Document Java code and applications.
- Stay up-to-date on the latest Java technologies.
