Description

IBM Recruitment 2023

As an Information Security Executive at IBM, you will be responsible for ensuring the confidentiality, integrity, and availability of our organization's information assets. Your expertise in information security, risk management, and compliance will play a critical role in safeguarding our systems and data from cyber threats.

IBM Jobs Near Me

Responsibilities:

1. Security Operations: Monitor and analyze security events and incidents to identify potential threats or vulnerabilities. Respond promptly to security alerts, investigate security breaches, and implement appropriate remedial actions. Collaborate with cross-functional teams to implement security controls and technologies.
2. Risk Assessment and Mitigation: Conduct regular risk assessments to identify and evaluate potential security risks and vulnerabilities. Develop and implement risk mitigation strategies and controls to minimize the impact of security incidents. Stay updated on the latest security threats and industry best practices to proactively address emerging risks.
3. Compliance and Policy Management: Ensure compliance with relevant security standards, regulations, and internal policies. Develop and maintain information security policies, procedures, and guidelines. Conduct security

awareness training and provide guidance to employees on security best practices.

IBM Careers

Requirements:

1. Strong Technical Knowledge: In-depth understanding of information security principles, concepts, and technologies. Familiarity with security frameworks (such as ISO 27001, NIST, or CIS) and knowledge of network security, vulnerability management, access controls, and encryption technologies.
2. Analytical and Problem-solving Skills: Excellent analytical and problem-solving abilities to assess complex security issues, identify patterns, and develop effective solutions. The ability to think critically, anticipate potential risks, and apply logical reasoning to security incidents is crucial.
3. Communication and Collaboration: Effective communication skills to articulate complex security concepts to both technical and non-technical stakeholders. The ability to collaborate and work well within a team, as well as with external partners and clients, is essential.
