Description

IBM Recruitment 2023

The Java Developer is responsible for developing and maintaining Java-based applications. This includes designing, coding, testing, and debugging applications. The Java Developer must have a strong understanding of Java programming language and be able to work independently and as part of a team.

Responsibilities:

- Design, develop, and maintain Java-based applications.
- Work with other developers to design and implement new features.
- Test and debug applications.
- Document code and procedures.
- Stay up-to-date on the latest Java technologies.

(adsbygoogle = window.adsbygoogle || []).push({});

Skills:

- Strong understanding of Java programming language.
- Experience with object-oriented programming.
- Experience with unit testing and debugging.
- Experience with version control systems.
- Excellent problem-solving and analytical skills.
