Description

IBM Recruitment 2023

We are seeking a skilled and innovative Cloud Architect to join our team at IBM. As a Cloud Architect, you will play a key role in designing and implementing cloud-based solutions to meet our client's business needs. This is an exciting opportunity for individuals who are passionate about cloud technologies, possess strong architectural skills, and thrive in a dynamic and fast-paced environment.

IBM Jobs Near Me

Responsibilities:

- Collaborate with clients to understand their business requirements and develop comprehensive cloud strategies and architectures.
- Design, plan, and implement cloud-based solutions, ensuring scalability, security, and performance.
- Evaluate and recommend appropriate cloud technologies, platforms, and services to meet client needs.
- Define cloud migration strategies and provide guidance on the adoption of cloud technologies.
- Design and implement cloud infrastructure, including virtual networks, storage solutions, and compute resources.
- Ensure high availability and fault tolerance of cloud infrastructure through effective design and configuration.

- Monitor and optimize cloud resources to ensure cost efficiency and performance.
- Define and enforce cloud governance policies and procedures to ensure compliance with industry regulations and client requirements.
- Establish and implement cloud security controls, including identity and access management, encryption, and data privacy.
- Conduct regular audits and assessments of cloud environments to identify and remediate potential risks and vulnerabilities.
- Stay updated with emerging cloud technologies and industry trends, evaluating their potential impact on cloud architectures and strategies.

IBM Careers

Requirements:

- Strong knowledge of cloud computing concepts, architectures, and best practices.
- Familiarity with cloud platforms such as Amazon Web Services (AWS), Microsoft Azure, or Google Cloud Platform (GCP).
- Proficiency in cloud infrastructure technologies, including virtualization, networking, storage, and computing.
- Experience with Infrastructure as Code (IaC) tools like Terraform or CloudFormation.
- Understanding of cloud security principles, protocols, and tools.
- Strong analytical and problem-solving abilities.
- Excellent communication and collaboration skills to work effectively in cross-functional teams.
- Relevant certifications in cloud technologies (e.g., AWS Certified Solutions Architect, Azure Solutions Architect) are a plus.
