Description

IBM Recruitment 2023

We are looking for a Systems Analyst to join our team and help us design, develop, and maintain our enterprise systems. The ideal candidate will have a strong understanding of systems analysis and design principles, as well as experience with a variety of programming languages and technologies. You will be responsible for working with business stakeholders to understand their needs, and then translating those needs into technical specifications. You will also be responsible for developing and testing software solutions, and ensuring that they meet the requirements of the business.
