Description

Infosys Recruitment 2024

Infosys, a global leader in consulting, technology, and next-generation services, is seeking a talented and curious individual to join our growing Data Analyst team. In this role, you will play a vital role in transforming raw data into actionable insights that drive strategic decision-making across the organization.

Infosys Jobs Near Me

Are you passionate about using data to solve complex problems and unlock new opportunities? Do you thrive in a collaborative environment and enjoy working with cross-functional teams? If so, then a career as a Data Analyst at Infosys could be the perfect fit for you!

Summary

We are looking for a highly motivated and detail-oriented Data Analyst to join our team. You will be responsible for the entire data analysis lifecycle, from data collection and cleaning to analysis, visualization, and reporting. You will work closely with business stakeholders to understand their needs and translate them into actionable insights that can be used to improve efficiency, optimize processes, and drive business growth.

This is an exciting opportunity to develop your data analysis skills and gain experience working on cutting-edge projects at a global company. Infosys offers a competitive compensation package, a collaborative work environment, and the opportunity to work with some of the brightest minds in the industry.

```

Key Responsibilities

- Gather, extract, and transform data from various sources, including databases, applications, and flat files.
- Clean and prepare data to ensure accuracy and completeness.
- Perform exploratory data analysis (EDA) to identify trends, patterns, and relationships in data.
- Develop and implement statistical models and machine learning algorithms to uncover hidden insights.
- Create clear and concise data visualizations, such as charts, graphs, and dashboards, to communicate findings effectively.
- Develop and maintain data pipelines to automate data collection and analysis processes.
- Write technical reports and documentation to communicate data analysis results and recommendations to stakeholders.
- Work collaboratively with business partners to understand their needs and translate data insights into actionable business recommendations.
- Stay up-to-date on the latest data analysis tools and techniques.

Required Skills and Qualifications

- Bachelor's degree in Computer Science, Statistics, Mathematics, or a related field (or equivalent experience).
- Minimum 1 year of experience in data analysis or a related field (for experienced candidates).
- Strong analytical and problem-solving skills.
- Proficiency in SQL for data querying and manipulation.
- Experience with data visualization tools such as Tableau, Power BI, or Qlik (preferred).
- Experience with statistical software packages such as R or Python (a plus).
- Excellent written and verbal communication skills.
- Ability to work independently and as part of a team.
- Strong attention to detail and accuracy.

Experience

Freshers or Experienced Candidates can Apply

This role is a great opportunity for both recent graduates and experienced data analysts. We are looking for individuals with a strong foundation in data analysis principles and a passion for learning new things. If you are eager to develop your skills and contribute to a fast-paced and dynamic environment, we encourage you to apply!
