Description

Infosys Recruitment 2024

About Infosys

Infosys is a global leader in next-generation digital services and consulting. We enable clients to navigate their digital transformation journey with a highly experienced team, industry-leading solutions, and a focus on continuous improvement. Infosys is known for its collaborative and innovative work environment, fostering a culture where employees can learn, grow, and make a real impact.

Why Join Infosys as a QA Engineer?

In this exciting role, you'll play a pivotal role in ensuring the quality and functionality of our client's digital solutions. You'll be part of a dynamic team, collaborating with developers, product managers, and other QA professionals to design and execute test plans, identify and resolve issues, and deliver high-quality software. As a remote QA Engineer at Infosys, you'll enjoy the flexibility of working from anywhere while contributing to cutting-edge projects and shaping the future of technology.

Job Summary:

We are seeking a passionate and detail-oriented QA Engineer to join our growing remote team. You will be responsible for designing, developing, and executing test plans to ensure the quality and functionality of our client's software applications. You will work closely with developers and other stakeholders throughout the development lifecycle to identify and resolve bugs, ensuring a seamless user experience. This role offers the opportunity to work on a variety of projects using the latest technologies and methodologies, while continuously learning and expanding your skillset.

Infosys Jobs Near Me

Key Responsibilities:

- Design, develop, and execute comprehensive test plans covering functional, non-functional, and regression testing.
- Analyze requirements, user stories, and system functionalities to identify potential test cases.
- Utilize automation frameworks (like Selenium) to streamline the testing process and improve efficiency.
- Execute manual and automated tests to identify bugs and defects.
- Document test results, including bug reports with detailed steps to reproduce issues.
- Collaborate with developers and other QA professionals to resolve bugs and ensure timely issue resolution.
- Stay up-to-date on the latest testing tools, technologies, and methodologies.

Required Skills and Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Minimum 1 year of experience in software testing (freshers can apply).
- Experience with manual and automation testing methodologies (Black-box, White-box).
- Familiarity with testing tools like Selenium, Appium, or similar frameworks (a plus).
- Excellent analytical and problem-solving skills.
- Strong communication, collaboration, and interpersonal skills.
- Ability to work independently and as part of a team.
- Detail-oriented and quality-focused with a passion for ensuring high-quality software.

Experience:

We welcome applications from both experienced QA professionals and enthusiastic freshers eager to launch their careers in the dynamic world of software testing. If you possess the necessary skills and a strong desire to learn and grow, we encourage you to apply!
