Description

IT Specialist Jobs For IBM

As a Data Engineer at IBM, you'll play a crucial role in our data-driven journey. You'll be responsible for designing, developing, and maintaining robust data pipelines that ingest, transform, and deliver high-quality data to fuel critical business needs. You'll collaborate with a talented team of data scientists, analysts, and developers to ensure seamless data flow and empower informed decision-making across the organization.

IBM Careers

Responsibilities:

- Design and implement efficient data pipelines using technologies like Apache Spark, Airflow, and Kafka.
- Develop and execute data extraction, transformation, and loading (ETL) processes to ensure data quality and consistency.
- Build and maintain data infrastructure within cloud environments like IBM Cloud and AWS.
- Collaborate with cross-functional teams to understand data needs and translate them into technical solutions.
- Monitor and troubleshoot data pipelines, proactively identifying and resolving issues.
- Stay up-to-date with emerging technologies and trends in the data
