Wipro Jobs Near Me

Responsibilities:

1. **Software Development:** Design, code, test, and debug software applications using programming languages such as Java, C++, or Python. Collaborate with cross-functional teams to gather requirements and ensure the developed software meets the desired specifications.
2. **System Analysis:** Analyze user requirements and translate them into technical specifications. Evaluate existing systems and propose enhancements or modifications to improve functionality and performance.
3. **Application Maintenance:** Monitor and maintain existing software applications, identifying and resolving issues or bugs. Perform regular updates, patches, and fixes to ensure optimal performance and security.
4. **Code Review:** Conduct thorough code reviews to ensure adherence to coding standards, best practices, and quality guidelines. Provide

constructive feedback to peers and junior developers to enhance code quality and maintainability.

5. Documentation: Create and maintain detailed technical documentation, including software design specifications, user manuals, and test plans. Ensure documentation is accurate, up to date, and easily accessible to the relevant stakeholders.
6. Testing and Debugging: Develop and execute test cases to validate software functionality and identify any defects. Debug and troubleshoot issues to identify the root cause and implement appropriate solutions.
7. Collaboration: Work closely with cross-functional teams, including business analysts, designers, and quality assurance professionals, to ensure smooth software development and delivery processes. Collaborate effectively to address any dependencies or integration requirements.
8. Continuous Learning: Stay updated with the latest programming languages, frameworks, and industry trends. Continuously enhance your technical skills and knowledge through self-learning and participation in relevant training programs.
