Description

TCS Recruitment 2024

Build Scalable Data Pipelines & Empower Business Insights (Remote-Friendly)

Are you a data enthusiast with a knack for building robust data infrastructure? Do you thrive in collaborative environments, working alongside talented professionals to solve complex challenges? If so, then a career as a Data Engineer at TCS could be the perfect fit for you!

TCS Jobs Near Me

TCS is a global leader in IT services, consulting, and business solutions. We're a passionate team driven by innovation, constantly seeking bright minds to join our mission of helping businesses thrive in the digital age. In this role, you'll play a pivotal role in building and maintaining the data pipelines that form the backbone of our clients' data-driven decision making.

Summary

As a Data Engineer at TCS, you'll be responsible for the entire data lifecycle, from designing and building scalable data pipelines to ensuring data quality and accessibility. You'll work closely with data scientists, analysts, and business stakeholders to understand their needs and translate them into efficient data

solutions. This role offers a dynamic and stimulating environment where you can leverage your technical expertise to make a real impact on our clients' success.

```

Key Responsibilities

- Design, develop, and implement data pipelines for data extraction, transformation, and loading (ETL) processes.
- Utilize big data technologies like Hadoop, Spark, and cloud platforms (AWS, Azure, GCP) to build and manage data infrastructure.
- Maintain and optimize existing data pipelines to ensure efficiency and scalability.
- Implement data quality checks and procedures to ensure data accuracy and consistency.
- Collaborate with data scientists and analysts to understand data requirements and translate them into technical specifications.
- Document data pipelines and processes for clear communication and future maintenance.
- Stay up-to-date on the latest trends and technologies in the data engineering field.

Required Skills and Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Minimum 1-2 years of experience in data engineering or a related role (for experienced professionals).
- Strong understanding of data warehousing concepts and relational databases (e.g., SQL).
- Proficiency in programming languages like Python, Java, or Scala.
- Experience with big data technologies (Hadoop, Spark) is a plus.
- Familiarity with cloud platforms (AWS, Azure, GCP) is a plus.
- Excellent analytical and problem-solving skills.
- Strong communication and collaboration skills.
- Ability to work independently and as part of a team.

Experience

This role is open to both experienced data engineers and passionate recent graduates eager to launch their careers in this exciting field.

Why Join TCS

TCS offers a dynamic and rewarding work environment where you'll have the opportunity to:

- Work on cutting-edge projects with some of the world's leading companies.
- Collaborate with a diverse and talented team of professionals.
- Continuously learn and grow your technical expertise through comprehensive training programs.
- Enjoy a competitive compensation package and comprehensive benefits plan.
- Build a fulfilling career with a company that values its employees and fosters a culture of innovation.

Application Process

To apply, please submit your resume and cover letter online. In your cover letter, highlight your relevant skills and experience, and express your enthusiasm for this role and TCS.

Motivate to Join

Become a Data Engineer at TCS and play a critical role in shaping the future of data-driven decision making. Join our team and leverage your expertise to make a real impact on our clients' success, while propelling your own career forward in a stimulating and supportive environment.

General Overview

In this role, you'll be at the forefront of data engineering, designing and building the data pipelines that empower businesses to extract valuable insights from their data. You'll work collaboratively with a cross-functional team, applying your technical expertise to solve complex challenges and deliver innovative solutions. If you're passionate about data and eager to contribute to the success of a global leader, then TCS is the place for you!
