Description

Wipro Recruitment 2023

As a Cloud Architect at Wipro, you will play a crucial role in designing and implementing cloud-based solutions for our clients. You will be responsible for translating business requirements into scalable and secure cloud architectures, ensuring the optimal performance and reliability of cloud infrastructure.

Wipro Jobs Near Me

Responsibilities:

1. Cloud Solution Design: Collaborate with clients and internal teams to understand business requirements and design scalable and cost-effective cloud solutions. Develop cloud architectures that align with industry best practices and ensure high performance, availability, and security.
2. Cloud Infrastructure Implementation: Oversee the implementation of cloud infrastructure, including provisioning and configuring resources, setting up networking and security, and ensuring seamless integration with existing systems. Optimize cloud environments for performance and cost efficiency.
3. Cloud Strategy and Consultation: Provide strategic guidance to clients on cloud adoption, migration, and optimization. Assess their existing infrastructure, applications, and workloads, and recommend the most suitable cloud solutions to meet their business objectives.

Requirements:

1. Cloud Expertise: Strong knowledge of cloud platforms such as AWS, Azure, or Google Cloud. Hands-on experience with cloud services, including computing, storage, networking, and security. Understanding of cloud architecture patterns and best practices.
2. Technical Proficiency: Proficient in scripting languages (e.g., Python, PowerShell) and infrastructure automation tools (e.g., Terraform, CloudFormation). Familiarity with DevOps practices and tools for continuous integration and deployment (CI/CD).
3. Problem-Solving Skills: Ability to analyze complex technical challenges and propose innovative solutions. Strong troubleshooting and debugging skills to address issues in cloud environments. Attention to detail and a commitment to delivering high-quality solutions.
